SUMMARY

Artificial Intelligence and Machine Learning undergraduate experienced in machine learning model development, data preprocessing, and full-stack application engineering. Proficient in Python, XGBoost, TensorFlow, and modern web technologies, with experience building predictive models, RESTful APIs, and data-driven applications. Interested in developing scalable intelligent systems and performance-optimized software.

EDUCATION

Vignan Institute of Technology and Science CGPA: 9.42	Hyderabad, India
<i>B.Tech, Computer Science – Artificial Intelligence & Machine Learning</i>	<i>Sep 2023 – Jul 2027</i>
HSC (MBIPC) — Percentage: 83.17	2021 – 2022
SSC — Percentage: 95.6	2019 – 2020

EXPERIENCE

Nirvaha Wellness LLP <i>Full-Stack Developer Intern</i>	Hyderabad, India <i>Oct 2025 – Dec 2025</i>
– Led end-to-end development and deployment of full-stack applications with React, TypeScript, Node.js, Express, and MongoDB. Created 10+ RESTful APIs and integrated JWT-based authentication, reducing latency by 30% while strengthening application security.	
Cothon Solutions <i>AI/ML Intern</i>	Remote <i>Mar 2025 – May 2025</i>
– Constructed an XGBoost-based airfare price prediction model achieving 98.76% R2 through feature engineering and hyperparameter tuning. Developed a CNN-based deepfake detection system achieving 84.67% accuracy and 0.91 ROC-AUC across 10,000+ images.	
Edunet Foundation – TechSaksham (Microsoft, SAP & AICTE) <i>AI/ML Intern</i>	Remote <i>Jan 2025 – Feb 2025</i>
– Built SVM-driven disease prediction models trained on 5,000+ patient records. Performed data preprocessing and feature selection, reaching 85% accuracy and enabling real-time inference via Streamlit dashboards.	

PROJECTS

ResearchPilot AI <i>RAG, LLaMA-3.3-70B, LangChain, ChromaDB</i>
– Engineered a Retrieval-Augmented Generation (RAG) workflow to analyze 1,000+ documents using vector embeddings and semantic search, improving contextual response accuracy by 35%.
PulseConnect – Blood Demand Forecasting <i>Multi-Agent Systems, Firebase</i>
– Implemented a multi-agent AI forecasting architecture powered by real-time Firebase streams, reducing emergency response time by 40% and increasing donor-hospital matching efficiency by 30%.
StartupConnect <i>React, TypeScript, Supabase, REST APIs</i>
– Designed and structured a full-stack platform featuring role-based authentication for 100+ users. Incorporated AI-driven skill matching, boosting relevant job-role matches by 25%.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, Java, C, SQL
Machine Learning: Scikit-learn, XGBoost, TensorFlow, Keras, CNN, NLP
Data Processing: Pandas, NumPy, Data Cleaning, EDA
Web Development: React.js, Next.js, Node.js, Express.js, Django, REST APIs
Databases: MongoDB, MySQL, Firebase, Supabase, ChromaDB
Tools: Git, GitHub Actions, Docker, Streamlit
Concepts: Data Structures and Algorithms, OOPS, System Design

ACHIEVEMENTS & CERTIFICATIONS

- Selected participant in Smart India Hackathon and national-level hackathons.
- HackerRank Certifications: Python (Gold), Java (Silver), C (Silver).
- NPTEL Certifications: Programming in Java and Introduction to C.
- Certified in SQL and Java; active in competitive programming.
